Sub.:- Schedule wise Load allocation of Various GSS feeding NBPDCI.

Sir

Area load Dispatch centre (ALDC) of NBPDCI has worked out the Schedule Drawl and Load pattern of the GSS & 33 KV feeders, keeping in view all normal conditions and exceptions as well.

Whereas, the schedule generally gets changed on short notice & sometimes without notice (in sudden or Emergency cases) also, due cares have been taken to allocate the load as shown in the attached report.

Schedule to various GSS will be automatically changed, to predefined allocation. The SLDC Hq. or ALDC will only give the Allocation No. 1 to 8. All concerned would follow that Allocation.

However, a constant contact and interaction between SLDC, ALDC, Grids and Circle Load Dispatch Centres (being established soon) is to be maintained for best coordination

Encl:- As above

Yours faithfully,

(Jitendra Srivastava)
MD, NBPDCI.
